“We take from
Nature only
what we can
return...”

Danilo Bruni
Chief Executive Officer

100%

eco

**Eco-friendly and totally
recyclable products.**

By purchasing an AnticoMestiere
product you become a friend of the
environment. We want to make the
world a better place to live, which is
why we only take from the Nature
only what we can return.

The **natural** characteristics of our products.

AnticoMestiere product lines have always been made with respect for the environment. Our goal is to give back to Nature all that she gives us, day after day.

Production of pots with low environmental impact

We work over 100 quintals of clay every day respecting the environment and the territory. Earth, water, air and fire are the four natural elements that we live every day. Support them, respect them and benefit from their energy has always been our goal.

-95% emission of Volatile Organic Compounds (VOCs)

In our products that are not made from terracotta, or in our brand-new colored terracotta, we use only water-based paints, which allow us to reduce by 95% the emission into the environment of VOCs (Volatile Organic Compounds), powders that are sometimes the main cause of allergies and skin irritations.

The power of the Sun

For 3 years we have equipped our structure with photovoltaic panels, managing to reduce the use of electricity by replacing it with a renewable energy source.

A low environmental impact market

Making eco-friendly products ensures that we can be appreciated by markets that adopt green philosophies.

We process over **100q** of **clay** every day according to **sustainable standards**.

Watch our video "**The Genesis**"

Welcome to the Catalogue 2027 AnticoMestiere.

A new vision of sales that points to the future.

Sections and news

In order to facilitate reading and the subdivision of the product categories, the catalogue has been divided into heading sections: each colour refers to the section of the product categories of the same name **AnticoMestiere 2026**.

This catalogue was created **with the consumer** in mind to ensure maximum clarity and simplicity in the display of basic product data for quick and effective consultation.

How to read the 2027 Catalogue

Guaranteed 10 years against frost

All products marked with this **blue** symbol are guaranteed for 10 years against frost and weathering. This material can withstand temperatures down to -20° C.

new

New in 2027

All products marked with this **red** symbol are new in the AnticoMestiere 2022 catalog and are often grouped into categories.

Minimum orders and warranties

In the event that the product travels with the FREE DOMICILE clause - reminding you that any breakage must be communicated to the company within and no later than 5 days from unloading, subject to a written reservation to be noted at the time of delivery on all transport documents - we inform you that, as from the entry into force of this catalogue, no refund will be granted if the minimum quantity ordered is not equal to or a multiple of the quantity indicated in the TABLE under the heading PIECES PER BOX. Compliance with the MINIMUM ORDER and the procedures for notifying the company of any faulty goods will ensure that the goods will be refunded; consequently, faulty goods must be proven by photographs and sent to the company. Finally, it will be refunded by issuing a credit note, subject to authorisation by our agent who will inspect the disputed product at your point of sale.

Warnings: the durability of the products for the times indicated depends on their correct use. Obstructing the water drainage holes in the bottom of the pots or placing them directly on the ground can cause premature deterioration of the material. Please be careful and, if necessary, ask your retailer for the information you need to use the products correctly.

Sizes, weights, packaging

For each item in the table you will find symbols that provide all the information about sizes, weights, packaging, and prices.

CM	Reference sizes in centimetres
COD	Product code
	External diameter in centimetres
	External height in centimetres
	External length in centimetres
	External depth in centimetres
	Gross weight in kilograms
	Minimum order
	Pieces per layer
	Pieces per pallet
	Price in Euro

i How to read the new product table

Each product has its own table with **symbols and codes** providing all the details on dimensions, weight, packaging, and pricing. The table also includes the **EAN-13 barcode** field for quicker and easier consultation.

i All images are for illustrative purposes only.
Each product is hand-finished and may differ from one another.

CM
Reference size expressed in centimetres. This size refers to the product's maximum overall size, generally its external diameter.
COD
The product code

Description
The product code is followed by external diameter (cm), height (cm), kilograms (Kg), minimum order quantity and quantity per pallet.

EAN 13
European Article Number: a unique code for scanning and identification.
Saucer
Table dedicated to the matching saucer, with corresponding size, code and unique EAN.

Many productions, one essence.

In the catalogue, you will find products from the classic Tuscan craft tradition and articles from other countries that come together to create the brand **AnticoMestiere**.

AnticoMestiere & Co, always innovative both in its models and in the choice of materials, it also makes use of synergies from other countries to better respond to an increasingly dynamic and demanding market, without ever neglecting the history and tradition of the product.

To help you in your choice, we indicate next to each photo the provenance of the vase for greater transparency.

Galestro

The brand that has always recognised **ABSOLUTE QUALITY** in the field of terracotta production.

For centuries in homes all over the world, these clays have been used for fine floor and interior finishes.

The vase acquires an absolute value over time, so much so that we consider it **for life**.

Galestro by

Drawing on the skill and experience of master potters who have been working in the field for centuries, **Terrecotte di Trequanda** has been producing traditional Tuscan vases since 1989.

Each article has its own story, the details are different, as are the defects that characterise the product, making it **UNIQUE**.

TerrArte

Production by our company in Romania. The clays are of good quality and give the product a guarantee of **ANTI-FREEZE**. The technology used makes the **LINEA TERRARTE** a product that, thanks to its quality/price ratio, stands out in the high-volume market, while maintaining high quality.

INSTRUCTIONS

Instructions to follow for a correct maintenance of **terracotta pots**.

Our terracotta pots are made from the precious clay of the Sienese hills. The processing, carried out with traditional techniques and the cooking carried out at temperatures over 1000 °C, gives the product a resistance to frost down to -20 °C. To obtain the maximum duration that our terracotta can offer, however, it is appropriate to follow some indications.

1

Empty the pot from water in the winter period and in any case when the temperature falls below 3° C and make sure that the rain does not fill the objects again.

2

In the case of clays filled with soil, make sure that the drainage hole is always free and not obstructed by roots, soil or other objects.

3

In items used as pot holders, make sure there is no stagnant water inside and empty them if necessary.

4

The saucers used to collect water from watering, it is good care to turn them upside down when the temperature drops below 3° C. Do not leave the pot in a continuous water bath, but lift it with terracotta spacers.

5

Use extreme caution when moving objects when frozen because the bottom of the pot may be stuck to the ground. Do not use boiling water on pots to melt ice or snow, nor substances such as salt or similar products.

6

It is preferable to use feet under the pots to separate them from the ground

7

If the pot is moved indoors, it is better to cover it with a burlap bag or TNT sheet so that it can be protected from cold and humidity.

Guidelines for proper maintenance of **terracotta pots**

If the pots are stained with grass, you can clean them by brushing them with water and vinegar. For nastier adversaries, such as fungus or moss, it is recommended to use bleach applied with a brush and rubbed in with a hard nylon bristle brush. Leave it on for a few minutes and rinse with warm water. If the effect is still not as desired, repeat the operation several times.
